LOCAL NEWS ITEMS

Announcement is made by advertisement in this issue of a display of dresses and coats to be made at Mrs. Packwood's millinery parlor on Friday, September 14.

The official report of the recent inspection of the Vulcan Cadets has just been received. Every department of the corps organization and performance is rated as "good." This is a fine credit to the boys and highly gratifying to the officer in command. The report would indicate that the standing of the corps in the province will be high.

LOCAL NEWS ITEMS

The Royal Rooms, near C. P. R. station, main street, Vulcan, Rates 75c and \$1.

Born, at Mrs. Speer's hospital in Vulcan, on September 6th, 1928, to Mr. and Mrs. H. S. Minnie, of Vulcan, a son.

Posters announce a dance under the auspices of the Golf Club, to be held on Thursday next. This is the first club function of the fall season and promises to be a popular event.

Two cornet players will be added this week to the roster of the Citizens' Band. Now that the holiday season is over and Mr. Bird has returned, the band will resume practice and a program of good music may be anticipated.

Splendid progress is the report on the building enterprises in Vulcan, which include new homes, hospital, nurses' residence, memorial hall, and elevator. The work goes rapidly on.

The weather conditions for the past week have been ideal for cutting operations and for drying the swathed and stooked grains. Considerable grain has been combine threshed, and some grain has been delivered to the elevators. The samples of grain show good color and large kernels. Threshing in the old way will start shortly, the machines and men being assembled for the work. Everything was going fine until Thursday night, when there was a slight snow, which will perhaps cause a pause in the fields.

"I never saw such crops as I did this morning coming along the Alderside line. The Vulcan district looks particularly blessed with heavy stands of wheat now ripening for the harvest. We think we have fine crops in the north country, but this is the wheat country. The area of your fields must be seen to be appreciated." This is the reference made to Vulcan in a statement made on Wednesday by Mr. A. R. Groff, a news writer of the Edmonton Journal, who was on a short motor tour through the south. The Advocate man has particular interest in this statement regarding our district, for this Mr. Groff was foreman in the print shop where we were an apprentice when we were only eighteen in years.

Mr. "Bill" Oliver, famous as a photographer, was in Vulcan and the district on Wednesday. On receipt of a wire from Ottawa requesting for the government department a series of pictures, both still and movies, of the best possible harvest operations, he struck straight for Vulcan. The fine fields in proximity to town afforded him the opportunity to "shoot" the desired great crops, swathing, combine operations, threshing and hauling, and the many activities in connection with the great industry of grain growing. Picture record is being made also of the experiences of the British men sent in for the harvest, and there are a number of these in this vicinity who would appear to have been splendidly located. The pictures are for publicity purposes and, as all titles will bear names of people and places, Vulcan will have added fame.

The Legion is again to the fore with a boxing card that promises first class entertainment for the fans. Young Kwiczak, who is well known here, will meet Frank Jackson, of Winnipeg, a young boxer who is breaking into the "pro" ranks, and they will furnish the main event. Young Daines (a brother of Basil) and Frank Bender, of Drumheller, will furnish the semi-windup. These boys are around 130 pounds and have the reputation of fast and clean fighters. The promoters also have a line on two young flyweights, recently from England, whom they hope to have furnish one of the preliminaries. The usual junior bouts will start the bill, and the card should be worth while going a long way to see. The Legion is putting all proceeds to the fund for the new "gym." Nuf sed. Saturday, September 15th, is the date of the big event.

LOCAL NEWS ITEMS

If there was more parental control in the country there would be less excuse for government control.

"Canadian" is a peculiarly melodious name, with such proud associations, that Canadians are always glad to be called by it and no other.

The names of two more citizens are to go on the paint-up honor roll this week. They are Messrs. T. B. Lebeau and G. McQueen, who have beautified residence premises in Vulcan.

The next regular meeting of Ferrodale chapter, O.E.S., will be held on Tuesday, September 11th, commencing promptly at eight o'clock. Visiting members of the order are welcome.

Mr. and Mrs. Billy Recor, Mr. Ray Flynn and Miss Grace Peck were week end visitors to Calgary, the guests of Mr. and Mrs. A. J. Ober. Mr. Del McQueen was also a week end visitor in the city.

Rev. R. G. Watt, of Cayley, will conduct the regular services at the United Church on Sunday, morning and evening, and at Mayview and Red Cross in the afternoon. Everybody welcome.

If people spent Sunday as a day of physical rest and spiritual observance, as it was intended they should do, there would not be so many accidents. You can't make a holiday out of a holy day.—Blyth Standard.

Mrs. Newwed (at dinner table)—"I was going to have some sponge cake as a surprise for you, dear, but I confess it was a failure." Mr. Newwed—"What was the matter?" Mrs. Newwed—"I don't know for sure, but I think the store sent me the wrong kind of sponges."

A Chinese boy, William Kay of the town of Arrowwood graduated with honors from the Military Flying School at Marshall, Missouri, U.S.A. Recently, Kay is now completing his 50 hour course in advanced aviation and is also specializing in piloting such new production airplanes as the Monocoupe and the Waco. In company with his father, Kay hopes to pioneer in commercial aviation in China. This young Chinaman is considered one of the best flyers in the continent.

Again we welcome you to the services of the Church of Christ. The Bible school is gaining, but there is room for more, and you are urged to attend, at 10 sharp. At the morning service Bro. Williams will speak before the Lord's Supper. In the evening the pastor will bring the message subject, "The conversion of Zacharias." Good music—is assured. A great song service before the sermon. We extend an invitation to the school students to attend the services. We will try to be helpful to you. The public is invited.—O. P. Burris, minister.

Dr. Carson and Dr. Burke will this week remove to quarters in the new Carson block, which has been sufficiently completed to permit of occupancy. This block, which has had mention at the several stages of its construction, is a real asset to the town as a substantial and attractive building, adding much to the appearance to the rapidly improving business section. It will provide separate suites for the two medical men, and these will have modern appointments and equipment. There will be every accommodation for those who might have business at the place, and as a doctor's office it is perhaps unsurpassed by any in the province outside of the larger cities.

The tenth annual convention of the Women's Institute, Little Bow constituency, was held at Barons on August 31. The detail of this important event will be reported in these columns next issue. Members of branches in Vulcan and district figured prominently in the deliberations and were also honored in their election to official position. Mrs. A. T. Martin presided, and was again unanimously chosen as constituency convener. Mrs. A. J. Kennedy responded to the address of welcome, and was chosen as chairman of the committee on education and better schools. Mrs. George McMann was re-elected secretary. Mrs. D. H. Galbraith presented a paper on the subject of legislation and was chosen chairman of the committee on legislation. Mrs. William Peterson was selected as head of the committee on household economics. Vulcan delegates extended an invitation to the members to hold the next constituency convention in Vulcan, and the invitation was cordially accepted.

LOCAL NEWS ITEMS

Mrs. A. Zeigler, of Ohio, left Monday on the return trip home, after a month spent in Vulcan and vicinity with Miss Rinehart and other relatives.

Services at St. Aldhelm's Church on Sunday, September 9th. Sunday school 10 a.m., matins 11 a.m., evensong 7:30 p.m. Service at Eastway school at 3 p.m.

Sunday last even exceeded the previous record of campers at the auto park. Tents, and cars were more numerous than the premises could accommodate.

Truck hauling for Mr. E. G. Gossett, Mr. Ross Walker made delivery last week of the first spring wheat of this year received at Vulcan. The grade was good, and the grain was purchased at the Parish & Heimbeck or by Mr. Chet. Wallace. This goes as one of the records in connection with the immense grain trade at this elevator city. The first delivery of fall wheat was reported last week.

The many men who were everywhere in evidence on the street the latter part of last week have since found their way to the fields. The rink was not required for long as a place of accommodation and the dining hall was for but a few days. Men satisfied to secure a job were appreciative of the treatment accorded them by town officials and citizens generally.

Credit for shipping out the first carload of wheat of 1928 production goes to the Wheat Pool elevator, managed by Mr. E. G. McLean. It was fall wheat. The first car shipment of spring wheat was made by Mr. Frank Keiver, of the Alberta Pacific elevator, and the grain was combine harvested on the premises of Mr. J. Jamison, adjoining town. This is the report of first load records, and now there is to come the big yield and big load figures, which are each year anticipated with considerable interest.

The address at the evening service at the United Church last Sunday was delivered by Mr. Everett Gardner, a former Vulcan boy, and he was accorded the reception of a capacity congregation. Everett Gardner is truly a native son of this town, having the distinction of being the first boy born in Vulcan, and citizens remember his record as a school pupil, the oratory winner at the school fairs, have knowledge of his college accomplishments, and with confidence anticipate his success in the profession which he has chosen.

The Wheat Pool will make an extra payment of 3 1/2c per bushel on special bin grain, and 4c per bushel on cash wheat, handled by the Pool last season. To localize the proposition it will mean that \$10,000 will be distributed to farmers at Vulcan who were patrons of the Pool. Simply, the Pool is dividing the extra profits from the 1927 crop among the wheat growers, and the amount mentioned will be paid to local men who delivered wheat to the Pool at Vulcan. The payment has nothing to do with the final payment on last season's wheat. The final payment is yet to be announced.

The oil excitement in Vulcan is not what it once was. Excitement has given place to patient business. The Vulcan and Spooner wells are now only occasionally mentioned, but they are not any the less important. Announcement has just been made that Spooner No. 1 is now a one hundred barrel well. Vulcan No. 1 keeps up production, with occasional stops. It is the intention at some time to again work the drill in this well, but this will not be undertaken until equipment now working elsewhere is available. In the meantime there is a slight variation in the stock quotations, but not much.

A very pretty wedding was solemnized in Vulcan, on Saturday, September 1st, at the home of Mr. and Mrs. A. L. Burrows, when Miss Doris Thompson, youngest daughter of Mrs. Adeline Thompson, became the bride of Mr. Ormonde Butler Harris son of Mrs. R. H. Harris, of Brantford, Ontario. Rev. J. N. Brunton officiated, and was assisted by Rev. Stanley Hunt. The bride, who was unattended, was given in marriage by her mother, wore a gown of periwinkle georgette and lace and carried a bouquet of roses. During the signing of the register, Mrs. R. E. Dodd sang "O Promise Me." Following the ceremony a buffet luncheon was served. Only immediate friends and relatives were present. Later Mr. and Mrs. Harris left for Grand Prairie and other points, where the honeymoon will be spent, the bride traveling in a smart ensemble of navy and buttercup with a small hat to match. On their return they will make their home in Edmonton. They left Vulcan in the usual shower of rice and confetti. According to an old custom the bride on leaving threw her bouquet across her left shoulder and Miss Beulah Walker was the lucky one to catch it.

LOCAL NEWS ITEMS

Born, at the Rinehart hospital in Vulcan, on September 1st, 1928, to Mr. and Mrs. Earland Anderson, of Milo, a daughter.

The orchestra returned to Vulcan late last week, and the splendid patronage at the dance Saturday night made a pleasing reception and was a nice compliment to the boys. Mr. Bird has already contracted several engagements in the vicinity.

Mr. K. R. McLean, optometrist, of Calgary, who has been making monthly visits to the King drug store, wishes to take this opportunity of announcing that he now has associated with him Mr. Melville Anderson, optometrist, of Calgary. To better care for a rapidly increasing practice fortnightly visits will be made to Vulcan in future, the next date being Saturday, September 15th.

The last week has been one of marriages at Vulcan. The principal in one of these happy events were Miss Bernice Olive Hansen and Mr. Elymer David Laughlin, both of Milo. The marriage took place at the United Church manse, on August 28th, and Rev. J. N. Brunton was the officiating minister. It is one feature of a good start to get married in Vulcan, and all citizens will wish them well.

The flock of hundreds of chicks at the poultry yard in town, owned by Mr. H. C. Hoskyn, and in their first days were likened to lemons with legs in an item in these columns, have made a new mark in their record of chickens. On Wednesday they produced the first egg. Mr. Hoskyn's venture in the poultry business has proved a real success, and the lay-out is evidence of the fact. There has been the development of a hennery of some proportions.

The question of what Vulcan is going to have in the way of hockey this winter has been brought to attention by the presentation to the sporting editor of a couple of players who might be available to Vulcan if there be anything doing here this season. One young man with unusual talent and a splendid record is desirous of locating here. The harvest brings to these parts many young men of athletic capabilities, a number of whom would be pleased to make the winter here, and the present is none too soon to make calculations if a team of the desired calibre is to be secured.

Corn on the cob, of excellent quality, grown right here in the suburbs of Vulcan, was presented to the editor of this community journal by Mr. L. Seaman. When Mr. Seaman goes fishing he brings in a fish or two—and he knows how to get them. This item is not to report on the tastes of the printer, but rather to record the productivity of the country. Mr. Seaman has grown small fruits of different kinds for some time, and has on his farm a tree that this year produced a quantity of plums, a fruit that certainly is uncommon as a native product. Proof is being constantly added that almost everything can be grown in southern Alberta.

Calgary papers recently heralded the coming to Vulcan of Frank Jackson, a boxer of some renown. He is here, but is now in the harvest fields giving aid in the big industry of this country, and incidentally making the coin and increasing the muscle. Jackson is a 155-pounder, and a likely and likeable chap. He comes from Winnipeg, and he was a close competitor for a place with the unit men who represented Canada in the Olympic contests. The sport editor was permitted to witness the young man in a work-out, and he is a nifty and shifty performer. He made no mistake in coming to Vulcan, where worthy boys get a fair and square deal from the boxing promoters, and already an engagement has been contracted.

Married, in Vulcan, on Monday, September 3rd, at 8:30 in the evening, Mr. Robert Duncan McElroy and Miss Mary Ellen Johnston. The interesting ceremony took place at the United Church manse, with Rev. J. N. Brunton officiating, and was attended by Mr. J. N. Johnston, father of the bride, and Mr. and Mrs. C. Wallace and Miss Arlene Wallace. The bride is the daughter of Mr. and Mrs. J. N. Johnston, of Vulcan, and the groom is the son of Mr. and Mrs. Robert McElroy of Blackie, and has been a resident in Vulcan for a couple of years. Both are well known locally and are popular in a large circle of friends. The bride was recently the guest of friends at a shower given at the home of "Grandma" Johnston, a feature of which was the wheeling-in of a wagon load of gifts by little Miss Marie Johnston. Dainty lunch was served, and in joyous and sincere spirit were expressed the good wishes for the future success and happiness of the young people who are to establish a new home in the town that has so long been home to them. All who know Mr. and Mrs. McElroy will join in the felicitations.

Because Life Is Uncertain

"HE that hath wife and children," wrote Sir Francis Bacon, "hath given hostages to fortune." Because life is uncertain let a Manufacturers Life policy secure the future of loved ones. And remember, too, that life insurance will guarantee independence, and so add years of contentment to your life by lessening financial worries.

VULCAN, ALBERTA

A CAMPAIGN PROMISE

A candidate for U.S. senator in the State of Washington is trying to get votes in the part of the state close to the Canadian boundary by promising to get rid of the fumes from the Trail smelter in British Columbia. That fellow is too much of a genius to be a politician, says the Lethbridge Herald; he should join Thos. A. Edison as an inventor. What does he intend to do to drive back the fumes? Probably he has in mind a wall higher than the U.S. tariff against Canadian products. Nature is one of the things, Uncle Sam can't control and if the winds blow the fumes from the Trail smelter into Washington, it will take some considerable legislation to control them. But then candidates can achieve wonderful things in election campaigning.

THE SCHOOL TEACHERS

The first days of autumn bring back to our cities and towns those earnest people who teach in our schools. The impression has prevailed among some that these folks have a somewhat easy time, as the result of a five day week and long summer vacation. Some teachers without much enthusiasm for their work may slip along in an easy way. But if they try to do that, their chances for promotion are poor. The great majority of them are hard working folks, who feel their responsibilities quite heavily, and who carry a burden of anxiety created by the failures and indifference of the more indolent and stupid pupils. The good teacher's work is not ended when the children are dismissed. Then it is necessary to begin on hours of preparation for the task that is to come, and many hours must be spent in correcting papers and giving help to backward pupils. The problem of discipline is not solved by any system of rules. The teacher must somehow be able, through some spirit of personal magnetism, to communicate inspiration and ambition to children who naturally are dull, phlegmatic, or mischievous. The good teacher must feel under strain much of the time, as she tries to keep herself alert and smiling, in the effort to secure the co-operation of all these children, so many of whom do not naturally have any desire for learning. It is hard to keep up this high level of enthusiasm day after day. It is not to be wondered at that many teachers get nervous and fatigued through this constant effort. We all owe them much for their sustained earnestness and devotion.

Public Opinion, a newspaper published in Decorah, Iowa, dated August 15, 1928, should bring tears of regret for the ignorance displayed by some of our neighbors across the line. Comment is unnecessary. "W. F. Hoyt was in a Canadian city recently and relates that while driving along with his Ford car, a policeman halted him. He had visions of a fine, but instead of that all the policeman wanted was to see the Ford car, and what it looked and acted like. Very few Fords are run in Canada and very few of any makes are used there. Canadians either walk or use the faithful old horse."

When Joseph Howe was pleading his own case in a libel action brought against him many years ago, he said that some people seemed to think that the freedom of the press meant to read a paper several years and then refuse to pay for it.

THE TEACHER'S REWARD

With the approach of autumn, the schools have opened. To their labors an army of teachers are summoned, and for nine months or more the daily activity in classroom must continue. For teaching is a profession that levies tribute on heart and brain and body. A real teacher's work is not over when the bell rings and classes break up for the day. A mechanic can throw down his tools when the whistle blows, go home and forget them until tomorrow. But a teacher a moulder of youth, cannot do that and remain a teacher. The rewards of the teaching vocation are certainly not financial. The average teacher and college professor is poorly, inadequately paid. Salaries for teachers are better than they were. They could be better still, but at their best they are but a small part of the teacher's compensation. The association with youth, the opportunity to watch the growing mind and inspire that mind to worthy ideals, the bringing out of obscurity into light of personalities latent or dwarfed for one reason or another, is great gain, is satisfying and lasting. Let the school teacher, whether grade or high, the college professor and even the modest but necessary tutor, ponder this well. The rewards of the teacher are as substantial as the Rock of Gibraltar and eternal in the values that matter most.—Hanna Herald.

REVOLUTIONIZED

The Manitoba Free Press, which for a long time was very skeptical about talk of using the combine for harvesting Western Canada's grain crop, has changed its mind, and says editorially: "After two or three years of cautious experiment, what seems like a first class revolution in western harvesting methods appears to be taking place this year. This is in the greatly increased use of 'combines' in the grain fields of the prairie provinces. In Saskatchewan alone, it is estimated that 5,000 of these machines will be used this season, compared with less than six hundred in the 1927 crop year. Everywhere implement dealers report that their trouble is not in making sales but in supplying orders already received.

THE COW ON PARADE

The season of the year is at hand when the dairy cow, marcelled and manicured, is at home to all her human friends—at the annual dairy shows and exhibitions. With hoofs and horns polished, tail braided and then unbraided into a delicate curl, her sides sleek from much brushing by the proud herdsman, a dairy cow ready for the show ring is an object of beauty capable of thrilling any but the dullest of human hearts. Dairy cattle shows are great spectacles, but that part is only a by-product, for these exhibitions have a definite mission to fulfill in the development of the dairy industry.

The cow of the present bears so little resemblance to her native stock that she might almost be a new species. More than one hundred years ago, breed associations set up standards for what cow should be. They created in theory, the ideal cow and then by scientific mating, set about to develop her in fact. Standards have improved as years have passed, and breeders of dairy cattle are working toward newer ideals in the physical structure of the cow. At these annual dairy shows, the finest specimens of the breeds are brought out and judged in competition with their kind. The contests offer an opportunity to measure the progress of dairy cattle breeding. Any person in Canada can attend at least one dairy show and should do so.

The ruling of County Magistrate W. A. Smith, of Essex, that all liquor export business to the United States is illegal under the Canadian law will effect exporters on the Canadian border all along the Great Lakes. Law abiding citizens will hope that the decision is not reversed by a higher court.

MAYBE HE'S RIGHT

If the average newspaperman is a liar, he generally lies to protect his community. If a boy goes out into the world and gets into trouble, the home newspaper says he was a good boy until he got away and got into bad company. If the town's tightwad who hugged his pennies to his bosom in life, dies, the newspaper throws a mantle of charity over him and says he hated wastefulness and his hate for useless spending made him overcareful in his investments and his charities. If the town gossip dies, the outstanding weakness is forgotten or overlooked and the editor proceeds to tell how she visited the sick and afflicted, and winds up by saying she was a good neighbor. If the home team goes away from home and gets the daylight whipped out of them, the home town editor tells the unsuspecting world that the team was made of second-string players. The editor isn't a liar from choice. The truth struggles in his manly breast, same as it does in the village preacher, but the pride of his community and the fear of the irate subscriber, makes him a trembling rabbit, and he lies to save the local pride of the town. Still it's a great life if you don't weaken.—Exchange.

COST OF TIRES

We read in Hardware and Metal, says the Post, that a cut in pneumatic tire prices recently announced applying on all makes lowers the difference between Canadian and United States prices, on ordinary sizes, to between seven and ten per cent, and on a few of the large sizes to 15 per cent, although there is a heavy duty on rubber entering Canada. When the Canadian sales tax is taken into consideration the actual difference between the two countries is reduced to about three per cent. In 1910 a certain make of tire cost \$42 now it can be bought for between \$4.50 and \$12 and the present day product will give from three to six times more mileage. The motorist certainly gets value for his dollar these days.

EARNING POWER AT EIGHTY

At eighty years of age, Lord Balfour is still going strong; so strong that he has been offered \$150,000 for the memoirs he is now writing. And one can easily imagine that his memoirs will be worth while, for he has been at the centre of things for over half a century. His earning power at eighty must be a sad blow to those who are fond of saying too old to forty, or fifty or sixty.

WHO WON THE WAR

The ridiculous claim put forward by a certain type of American that the United States "won the war" has been crushingly answered by Major Drew, who contributed an article on this subject to MacLean's Magazine some time ago. Answering the public demand MacLean's have printed the article in pamphlet form and will send a copy of same to all who remit a two cent stamp to cover postage. A cursory reading of what Drew says convinces us that all who care to have the facts would do well to avail themselves of this exceptional opportunity to get them.

It takes a sharp knock to break an egg from the outside, while a weak little chick with its soft bill can break it easily from the inside. It is the same way with a town. The knocks from the outside have little effect; it is the blows from the inside that hurt. It would be a good thing for any town if the home knockers would do the same as the little chicks do—get out.

A writer in Collier's seeks to dissipate the popular notion that the farmers of the United States need relief. He says they need intelligence enough to cut out the annual loss of \$150,000,000 through neglect of their machinery and he advises them to cease worrying about their export surplus and devote attention to producing the \$2,000,000,000 worth that is imported.

STORY OF THE PRESS

The Canadian North West Historical Society at Battleford aims to give Western Canada a definite historical policy by publishing in a uniform series the authentic stories and documents of our earliest history. Already the Society have published the Cree Rebellion, Louis Cochin, O.M.I. Canon Matheson, and the Story of the Press. Each publication contains material only relative to a definite subject. Research work is done in every subject. Thelst has about 75 subjects. This series will form the foundation for future historical reference. Western Canada's leading historians and Old Timers are writing and researching. Efforts are made to have all material most reliable and complete. The Society's funds are secured from a membership fee from Fellows, Life and Honorary Patrons. Its membership exceeds 1000 and 1500 is the objective. All money secured is used to publish. The Society makes its appeal to every historic locality of Western Canada, that it may secure material, interview Old Timers before it is too late, mark historic spots and in general emphasize Western history by saving it and making it known before the pioneer passes.

THE COTSWORTH CALENDAR

The plan itself is generally known. Each month would have twenty-eight days, that is, four exact weeks. An extra month, called Sol, would be inserted between June and July. There would be a Year Day, falling between Dec. 28th and Jan. 1, and a Leap Day once every four years. The advocates of the plan claim that it would enormously simplify accounting practices. Each month's calendar would look exactly alike; the days of the week and month would always fall on the same dates.—The Toronto Globe.

Do You Read the Newspapers?

Note the Sundays' toll of Accidents.
Note the reports of Accidents on the farm, on the street, or while riding in automobiles. Who knows but an accident may be your lot; if so, you know that not only you but your pocket-book will feel the blow. So let us tell you about our Sickness and Accident policy. We "say it with cash" when you have none. See us to-day.

Vulcan Herald
Published in the interests
of the People of Vulcan
and the Farms and the
Farmers of the District.
R. J. MONDS, Editor.

EDITORIAL

Vulcan is especially
fortunate this year in the
fine corps of teachers
which the school board has
selected. Not all of the
old ones are back, but we
are sure the new ones will
fill their places with credit
to themselves and the
community and we want
to take this occasion to
welcome them and assure
them of our support.

PITY THE POOR SCOT
who took his children out
of school because they
were compelled to pay
attention.

Woman didn't wait un-
til she got into politics to
become speaker of the
house.

A MOUTHFUL

The news that a tooth
was recently extracted
from the ear of a New
Jersey girl suggests the
probability that someone
tried to bite off more than
he could chew.

Be it ever so small there
is no place like your old
home town.

90,000 MEN
According to govern-
ment figures, 90,000 less
men are now employed in
Western grain fields each
year since the use of the
Combines has displaced
the old methods of har-
vesting and threshing. Are
you still carrying the bur-
den of that extra help dur-
ing the harvesting and
threshing season. You
can cut your labor outlay
during the harvest and
threshing by from five to
eight extra hired hands if
you use a McCormick-
Deering Harvester Thresh-
er.

The real trouble with
our youth of today is that
they were out most of the
night before.

To the school boy nothing
succeeds like a recess.
"That's the guy I'm lay-
ing for" said the hen as
the farmer hove in view.

Every purchaser of a
farm machine is entitled
to two kinds of service—
service from the machine
itself and service from the
organization back of it.
Nearly a century of ser-
vice of this kind from the
Harvester Company as-
sures the purchasers of
McCormick-Deering farm
machinery the same kind
of service in the future.

SCHOOL FAIR

List of Contributions to Annual Event at Vulcan

Below is printed a list of the con-
tributions, made in fees and dona-
tions, to the Vulcan and District
School Fair for last year. It will be
remembered that the fair last year
was cancelled on account of the pre-
valence of paralysis. The contribu-
tions again acknowledged will be uti-
lized in the promotion of the event
this year, and those paid previously
will be credited on account of 1928.
The collections were not all made in
1927 as a result of the cancellation,
and the opportunity is presented for
all who are not named on the list to
make donations according to their
disposition towards this annual com-
munity enterprise:

Collections 1927:

IRIS

The Bearded Flag Iris is deserving
of widespread planting in prairie
gardens. It is a hardy herbaceous
perennial that seems to have few in-
sect and disease enemies, and if the
few essentials in regard to its estab-
lishment and maintenance are heeded
it is a source of rich enjoyment. This
type of Iris wishes a well-drained lo-
cation, a sunny exposure, a soil con-
taining lime, and it is a wise precau-
tion here to give it a light straw
mulch in autumn. The plants should
be lifted every three or four years
and the rhizomes pulled apart and
give a change of setting. Planting
or resetting seems best done in July,
immediately after blooming is over
and when the plants are preparing to
send out a new growth of roots. These
early set rhizomes are clipped to
two or three inches are likely to give
stronger plants by winter, and hence
more vigorous bloom next season
than those not moved until Septem-
ber. Planting may be done next
spring but bloom is not likely to re-
sult until the second season. The rhi-
zome is not to be heavily covered
with soil and should not be any more
than three inches from the surface.
They may be set as close as nine or
twelve inches.

The Iris is a most deserving can-
didate for the flower border. It has
many merits to commend it. These
include stout erect healthy stems, a
wide choice of varieties which pos-
sess differences of season, height,
fragrance, color and form, and the
part that the foliage remains green
and attractive when bloom is passed.
The name Iris comes from the Greek
word denoting "Rainbow," and surely
this is suggestive to those seeking a
display of color for their border.
Moreover, as our prairie nurserymen
offer a choice list of varieties, worth,
a supply may be readily secured.

The Experimental Station at Mor-
den, Manitoba, is paying considerable
attention to Iris culture with gratify-
ing results.

RUMORS REFUTED

The Central Board of the Canadian
Wheat Pool announce the initial pay-
ment for the 1928-29 crop will be 85
cents a bushel basis No. 1 Northern
at Fort William and Vancouver. In
taking this step they are following
the same consistent policy pursued
from the formation of the pool. The
initial payment made by the Alberta
pool in 1923 was 75 cents and the
initial payment for the four subse-
quent years was \$1.00 a bushel. An
initial payment has always been based
upon market conditions at the op-
ening of the crop year and bears no
relation to the price per bushel ulti-
mately received by the pool members.
The secretary and manager, Mr.
Ramsay, says in this connection:
"We are starting the new crop year
practically sold out. The rumors
which have been circulated during the
past summer in respect to the large
stocks of wheat held by the pool are,
therefore, entirely refuted.

"The recent pool interim payment
which brought the price already paid
out to our members for the last
year's crop up to \$1.40 per bushel
basis No. 1 northern at Fort William,
should have made any reference to
such absurd rumors unnecessary. The
endorsement of the pool by the great
majority of grain growing farmers of
Western Canada who have signed up
for another five-year term is suffi-
cient proof that the faith of our mem-
bers in orderly marketing has not
been shaken."

In view of the vagaries of the
wheat market of late the cut from
one dollar to 85c is amply justified.
Whatever the 1928-29 wheat crop
may be worth on world markets will
be obtained for it by the pool. The
record of the organization since its
inception shows that its members
have fared better on the whole than
the average of non-poolers. Know-
ing that when final payment is an-
nounced they will have received at
least as much and in all probability
something more than non-poolers for
their crop, members of the pool will
not worry themselves unduly over a
reduction in the amount of the initial
payment.

DAIRY PRODUCTS

More than half a million pounds of
milk produced by the Central Ex-
perimental Farm herd at Ottawa, is
manufactured in the farm dairy. The
products made from this milk include
butter and four varieties of cheeses—
Cheddar, Meilleur, Buttermilk and
Cream. Butter is the principal pro-
duct, reaching in the year ending
March 31st, 1927, 15,502 lbs. This
product is sold as it is made locally.
The Cheddar cheese made is princi-
pally of the 10 lb. size, for which
there is a popular demand. The
three other varieties of cheese are
made in sufficient quantities to meet
a limited market demand among
those who become acquainted with
the merits of these products. In re-
ferring to the work of the dairy at
the Central Farm, Mr. G. B. Roth-
well, Dominion Animal Husbandman,
in his report for the year ending
March 31st, 1927, available at the
Publications Branch, Department of
Agriculture, Ottawa, announces the
more intensive study of dairy by-
products made possible by the re-
cently established bacteriological
laboratory in the dairy building.

CROP REPORT

Issued by Department of Agriculture,
Government of Alberta, Edmonton
September 1, 1928

Broken weather during the first
two weeks in August retarded the
ripening of crops and delayed har-
vesting a few days. The warm weath-
er of the past ten days has, how-
ever, been beneficial in drying the
grain for cutting, and in ripening the
late grains, and cutting is now gen-
eral over the entire province. The
Peace River country reports 75 per
cent of cutting done and threshing ex-
pected to be general by next week.
Central and southern parts of the
province report 25 to 30 per cent of
cutting done. Very little threshing
has been done in the province to date
and no estimate can be made at the
present time of the yield of the dif-
ferent grains. We do not anticipate
however, any increase in total yield
of wheat over that of 1927. The
quality of the grain being harvested
throughout the province is good.
Frosts have occurred in almost all
parts of the province but these have
been confined to small areas and the
average percentage of damage from
frost for the province will be small,
not more than 10 per cent. At the
most. Hail damage has been heavy
also in a few districts but the aver-
age for the province will be less than
last year. The percentage is estimat-
ed to be approximately 14 per cent
of the insured acreage as against 17
per cent last year. The crop in gen-
eral has been singularly free from
disease and insect pests.

Labor appears to be plentiful
throughout the province, wages run-
ning from \$3.50 to \$5.00 per day.
Swathing machines and combines are
being used more generally in the
province than was the case last year
and harvesting should go forward
rapidly.

The acreage sown to wheat will be
less than estimated at the beginning
of the season owing to the dry weath-
er at wheat seeding time. This
land, however, was sown to coarse
grains and the total acreage of the
province is approximately the same
as estimated.

The best crop of Southern Alberta
is progressing well and promises a
good yield per acre.

IS YOUR CHILD HANDICAPPED?

Does your child's nose run or is it
sore? Does the child snuffle? Are
the eyes red? Does the child seem
dull? Does it stand and look at you
with open mouth? Does it put its
hands to its head as though it had
earache? Does the child sleep with
its mouth open? Does it snore? If
the answer to any of these is yes,
ask the doctor if the child has ade-
noids or large tonsils.

Tonsils often become diseased and
stick out into the throat. Sometimes
diseased tonsils do not get any larger
but contain little pits filled with pus.
Diseased tonsils hold poisonous
germs which may cause throat trou-
ble or may be carried to other parts
of the body and cause serious sick-
ness. Adenoids look like a little head
of cauliflower colored red. They grow
in the back part of the throat where
the nose and throat joins and can be
seen only by the doctor with a spec-
ial mirror. They stop up the nose
and make the child breathe through
its mouth when the child breathes
through the mouth much dust and
many germs get into the body. Ade-
noids should always be removed.
Earache often means a child has ade-
noids. Earache always means the
child is in danger of getting deaf, al-
so there is the danger of running
ears. A doctor should treat a run-
ning ear always when adenoids grow
or tonsils become diseased the glands
of the neck try to carry off the pois-
on. This overwork makes glands en-
large and lumps are visible on the
neck.

Diseased tonsils and adenoids are
reservoirs for poisonous germs that
are frequently carried to other parts
of the body and cause sickness. Rheu-
matism and heart disease often come
in this way. Stomach, bowel or lung
disease may also arise from the same
source. A child with adenoids and
diseased tonsils can get the commu-
nicable diseases such as scarlet fever,
diphtheria, etc., very easily.

Often children who seem stupid
and who do not learn rapidly, can be
made healthy and normal by the re-
moval of diseased tonsils and ade-
noids. Don't wait thinking they will
get better. It is dangerous. Health
literature can be obtained free from
the Canadian Red Cross Society, 408
Civic Building, Edmonton, Alta.

KIRKCALDY NEWS

Mr. and Mrs. J. Fox motored to Nobleford on Sunday.

Mr. E. Saunders from Ontario is visiting with his son, William.

Mrs. Boose who has been ill in the Vulcan hospital is slowly recovering. Mr. and Mrs. Sprunt of Cayley spent Sunday at the home of Mr. and Mrs. Dunn.

Mr. and Mrs. Dunbar and family spent Sunday at the home of Mrs. A. J. Maisey.

Mr. and Mrs. Leslie Middleton have got settled in their home in Kirkcaldy.

Clifford Sherwin and Alec. Simon of Edmonton spent Saturday with Mr. and Mrs. Dunbar.

Miss McGinnis has returned to take charge of the Auburn school which reopened on Tuesday.

Mr. W. Maisey and son of Calgary are spending a few days with his brother, A. J. Maisey.

Mrs. Ziegler who has been visiting with her cousin, Mrs. Boose, returned to her home in Ohio, on Monday.

Mrs. A. Roebuck and Miss Gertrude are spending a few days in Calgary when Miss Roebuck will attend Normal.

Miss McFall who has been spending the summer holidays with her parents at Priest River, Washington, has returned to her school at Kirkcaldy.

Mrs. Lamb and children who have been spending the summer holidays with her brother, Mr. Agnew returned to their home at Milton, Ontario, on Tuesday.

The first load of wheat of this year's production to be delivered at Kirkcaldy was received at the National elevator by Mr. Bill Saunders. It was hauled by B. Ramsay and owned by D. G. Minard. Grade was good.

ITEMS OF INTEREST

"The chap who said, 'There were giants in those days,' must have been right. In the age of the scythe and the cradle they managed to get through their work; but now with tractors, ten-foot self-binders and even combined reapers and threshers we are always behind with the work. There is something wrong somewhere; it must be the Government; we hope it is not with the people."

To test the feasibility of a transcontinental air mail service, Squadron Commander Godfrey of Ottawa, is testing a large amphibian for the trip. It is proposed to make only one landing in Northern Manitoba. Upon the return trip from Vancouver, Mr. Godfrey will visit all air stations in the western provinces and may fly to the Great Slave Lake, a distance altogether of nearly 9,000 miles. He will carry a bag of mail for Vancouver. It will be the largest plane in Canada and will carry 400 gallons of gasoline.

Twenty-two English girls who are making a tour of Canada, under the guidance of the I.O.D.F., are expected to arrive in Calgary on Monday, September 9, where they will be entertained by Macleod Chapter, I.O.D.F. On Tuesday the party will motor to High River and on to Mr. Brown's ranch opposite the E.P. ranch where a luncheon will be tendered them by the Misses Brown and Mrs. Gardner who are members of the Macleod Chapter. After luncheon a visit will be made to the E.P. ranch to see this historic place, as well as see the splendid stock of horses, cattle and sheep.

The "Right" Way**There's No Better Method**

of reaching the people than through the medium of the Classified Advt. Everybody reads them, for they are news to those who seek something and likewise news to those having something to sell. MILO NEWS

Mr. J. M. Thomas has purchased a new Ford coach.

Construction has started on the new church parsonage.

Mrs. Hackin has been visiting in Regina the guest of her mother.

Mr. Garnet O'Neill, of Crossfield was a visitor in Milo this week.

Bruce Marsden (Slim) has changed his route from Cluny to Gleichen.

Mr. Harry Deltz is the proud possessor of a new Studebaker 70, the President.

Miss Marguerite Jackson leaves for Calgary shortly to attend the Normal School.

Mrs. P. H. Coleman and small daughter, Patricia, motored to Calgary for a short holiday.

Mr. Adam Mensinger left recently for Rochester and California. He is travelling in his new Buick.

Miss Louise Watt of Birtle, Man., is at present visiting with her brothers, George and Carman Watt.

We are glad to have Miss V. McCannell back again and looking so well after the summer vacation.

Miss Thelma Ferngren is at present visiting in High River, the guest of Mr. and Mrs. David McDonald.

Harvesting is in full swing in the Milo district and the town of Milo is a busy centre of activity these days.

The Baptist Ladies' Aid are holding a corn feed in the Majestic Theatre, Milo, on Tuesday, September 5th.

Miss Isabelle Shearer of Arrowwood was a visitor in Milo recently, the guest of Miss Martina Herrington.

Jack Johnson and Commodore Allan are the agents for the new Ford here and have been quite busy selling trucks.

Gladwin Laughren who has been spending the past six months in Calgary has returned home to help with the harvest.

Mrs. Smith, and her daughter who have been visiting with Mrs. Smith's daughter, Mrs. Harry Deltz, have returned to their home in Toronto.

Miss Dagmar Glambek has arrived home from holidaying in Seattle. She was accompanied by her brother Carl who is busy renewing old acquaintances.

The Majestic Theatre of Milo is fast becoming a very popular resort, especially on Saturday night. The management have installed one hundred and sixty new chairs which are a decided improvement.

Mr. and Mrs. A. Jordan and small son, Kent, of Calgary, were visitors in Milo on Monday. Mrs. Jordan was renewing old acquaintances. She was formerly Miss Marjorie Maybee and a teacher at Corbie Hill.

Miss Edith Millie well known in this district was a visitor in Milo recently while on her way to the Harwick ranch. Miss Millie is on a fare well visit to friends in this district, for she is leaving shortly for Jersey Island to spend a year or more.

A goodly number of neighbors and friends gathered to serenade the newlyweds, Mr. and Mrs. Elmer Laughland. Elmer was busily engaged entertaining his bride with a little tune on the violin and the tin band caught them completely off their guard. Songs were coaxed from a few members, the young folks danced and a few of the brides did their tricks, causing quantities of spontaneous combustion. After stowing away a goodly assortment of refreshments the revellers dispersed, well content to have done their duty by another couple starting on their way.

Plums, apples, raspberries and other fruits are now being grown in the Peace River country, 200 miles north of Edmonton. Successful experiments in respect of these fruits were conducted at the Dominion Experimental Farm at Beaverlodge.

ENSIGN NEWS

Born at Ensign on August 30th to Mr. and Mrs. McNary, a son.

Miss Cecile Masse has returned to Midnapore to finish in her school studies.

The new residence of Mr. Mullen's is almost completed and makes another added attraction to Ensign.

The new barber shop, owned by Mr. A. StPierre is now completed fully equipped and ready for business.

Miss Maisie Duguid has returned from Conrich after spending a few weeks at the home of Miss Angela Bantin.

Mr. and Mrs. Albert Ruark and family from Idaho, are visiting at the home of his brother, Mr. and Mrs. Frank Ruark.

Mr. and Mrs. R. Williams and daughter from Calgary are spending a few weeks at the home of Mr. and Mrs. A. L. Finlayson.

Mr. George Gordon has nearly finished building his new home, which contains eight rooms, hardwood floors and is furnace heated.

Mrs. J. Willet from St. Rock, Quebec and Mr. and Mrs. Wilbrod Morin and family from Butte, Montana, are visiting at the home of their parents Mr. and Mrs. N. Morin.

Mr. and Mrs. N. J. Dwigans entertained over the week end at their home, and the following were the guests: Mr. and Mrs. A.J. Flood and family of Vulcan; Mr. and Mrs. A. R. Dwigans of Blackie; Mr. and Mrs. E. A. Elston of Ensign and Mr. Will Burrows.

A well delivered address was given Sunday afternoon, September 2nd at the Ensign school house by the Rev. Mr. Farquhar. The subject was "The Measurements of 'God's Love.'" You are all cordially invited to attend these services every Sunday afternoon at 3 o'clock. We also have a large Sunday school conducted by Mrs. A. Smith at 2:30 p.m.

A record of 94 homesteads and five soldier grants taken out in one week at the Edmonton offices shows business to be booming. The week previous saw 83 homesteads and four soldier grants taken up, which is more than double last year's filings.
